Preface

It is our purpose to make this edition as comprehensive as possible, for either printer or author, and arrange same so that any effort in fact-finding as to type will be minimized to the greatest degree possible.

The Alphabetical Index on pages IV and V will show the case numbers and in what section type is available. Those who wish to refer to type by case number can obtain full information by referring to pages VI and VII.

The dollar sign ($), ampersand (&), and punctuation marks do not appear on specimen pages but are carried in every instance.

The letters L, M, J, or Lud appearing at the end of type titles indicate that only types so marked are available for machine composition, i. e., L = Linotype, M = Monotype, J = Job Section Intertype, Lud = Ludlow (Job Section). All faces and sizes of monotype are available in cases in the Job Composing Section.

All Foundry type is located in the Job Composing Section, but only one job case of each is available, therefore this should not be used unless absolutely necessary.

With the acquisition of any new type faces or miscellaneous characters, supplemental pages will be distributed within the Office, so that at all times this book will be up to date.

ALPHABETICAL INDEX

"Index by Case Numbers" on pages VI and VII

Name of Type	Case No.	Linotype Page No.	Monotype Page No.	Job Room Intertype Page No.	Ludlow Page No.	Foundry Type Page No.

The following sizes and styles of wood type are available for display work

Sizes are given in pica lines. Wood type increases and decreases in direct proportion. Example: Twelve line size is twice as wide and printing face is twice as heavy as six line size.

SIMILARITY OF CERTAIN LETTERS:

[Beth ב, Caph כ] [Daleth ד, Caph (final) ך, Resh ר]

[Mem (final) ם, Samekh ס] [Gimel ג, Nun נ]

[Teth ט, Mem מ] [Ayin ע, Sadhe צ]

[Cheth ח, He ה, Tav ת]

[Vau ו, Zayin ז, Yod י, Nun (final) ן]

Hebrew is written from right to left, and has no capital letters.

Five letters, *Caph* (כ), *Mem* (מ), *Nun* (נ), *Pe* (פ), and *Sadhe* (צ), have a different form when they stand at the end of a word (ך, ם, ן, ף, ץ).

In Hebrew writings, words were never divided at the end of a line. Either a blank space was left or certain letters (א, ה, ל, ם, ת) were stretched out (hence called dilatable) to fill the line. In Yiddish (printed in Hebrew characters), however, divisions are made when necessary, particularly in newspaper work, and this practice is followed in the Government Printing Office.

[a] The letter *Shin* (שׁ) differs from *Sin* (שׂ) only in the position of the diacritical point. Neither is much used, ש (without the point) being used for both.
